

Broken Arrow High School Wins Outstanding School Award

School honored for its outstanding implementation of SREB's powerful literacy and mathematics practices

July 8, 2019 — Broken Arrow High School in Broken Arrow, Oklahoma, won the 2019 Outstanding Secondary School Award from the Southern Regional Education Board. The school was honored at SREB's College- and Career-Readiness Standards Networking Conference on July 8 in Baltimore, Maryland.

The Outstanding Secondary School Award recognizes a middle grades school or high school in which at least 50 percent of teachers and leaders use SREB's powerful literacy and mathematics practices as a framework for daily instruction.

SREB's powerful literacy practices help teachers build meaningful literacy-based, standards-aligned assignments and empower them to own their personal professional growth and drive enhanced outcomes for their students. SREB's powerful mathematics practices offer teachers the instructional strategies they need to build students' procedural fluency while deepening their math knowledge and reasoning skills.

Since Broken Arrow High School began implementing these powerful practices, the school has infused literacy strategies across the curricula, and math teachers intentionally design lessons that engage students in a productive struggle.

SREB's College- and Career-Readiness Standards Networking Conference helps K-12 teachers deepen their implementation of powerful literacy and mathematics tools and strategies that enhance students' content knowledge and reasoning skills.

The Southern Regional Education Board works with states and educators to improve public education at every level, from early childhood through postsecondary education. Learn more about SREB at sreb.org.
