*Education Work Relationship; Educational Resources;
Elementary Education; Information Sources; Instructional
Materials; Learning Activities

ABSTRACT

This resource guide provides information on currently available career guidance materials and resources for the elementary and middle/junior high school levels. Section 1 contains National Career Development Guidelines for Elementary and Middle/Junior High School from the National Career Development Guidelines K-Adult Handbook. Section 2 is a template taken from the National School-to-Work Office's Web site. The template offers a list of suggested activities to enhance the career development of all students. Section 3, Career Development Activities Chart, indicates how the two models--National Career Development Guidelines and School-to-Work--can intersect to promote developmental career guidance through appropriately selected activities for students at all developmental levels. Section 4 is a list of materials and resources for use in career guidance activities in four parts Grades K-3, Grades 4-6, Grades 7-8, and Other Resources. Materials are listed alphabetically by title. Each listing contains the following information: title, author, date of publication, format, recommended age level, source, price, rating by practitioners, and descriptions. Sections 5-10 contain the following: an address list for sources of information; list of names and addresses of State Supervisors of Career Guidance, State Occupational Information Coordinating Committees, and State School-to-Work Coordinators and/or Grantees; abstracts with contact information for the Regional Education Laboratories; and an abstract of ERIC information sources. (YLB)

Disclaimer: This publication was prepared pursuant to a grant with the Office of Vocational and Adult Education, U.S. Department of Education. Grantees undertaking such projects under government sponsorship are encouraged to express freely their judgement in professional and technical matters. Points of view or opinions do not, therefore, necessarily represent official U.S. Department of Education position or policy.

Discrimination: Title VI of the Civil Rights Act of 1964 states: "No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance." Title IX of the Education Amendments of 1972 states: "No person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving federal financial assistance." Therefore, the National Center for Research in Vocational Education project, like every program or activity receiving financial assistance from the U.S. Department of Education, must be operated in compliance with these laws.

ACKNOWLEDGEMENT

A special Advisory Committee for the Elementary/Middle School Career Guidance Project provided invaluable assistance to staff of the NCRVE Office of Student Services in the preparation of this document. Their experience in the field of career guidance set the context for this project and guided the development of this publication. We greatly appreciate their time, help, dedication to the field, and guidance.

INTRODUCTION

Career theorists such as Ginzburg, Roe, Super, Crites, Holland, Tideman, and others have long emphasized the *developmental* aspect of career development, which they indicate should begin in early childhood and continue into the adult years. Despite the strength of these developmental theoretical perspectives, most career-related activity found in our schools has traditionally taken place in high schools. However, this trend is changing. Educators across the nation are becoming increasingly aware of the need to prepare students to begin planning as early as possible for the world beyond school, including the world of work.

A number of recent initiatives, including the *School-to-Work Opportunities Act of 1994*, have reemphasized the need to address career-related education at appropriate developmental levels. Resources such as the *National Career Development Guidelines K-Adult Handbook* (Kobylarz, 1996) provide educators a backdrop for delivery of high quality programs. The purpose of this resource guide is to provide practitioners with information on currently available career guidance materials and resources for elementary and middle/junior high school levels.

The information contained in this resource guide includes:

- The National Career Development Guidelines for Elementary and Middle/Junior High School, taken from the *National Career Development Guidelines K-Adult Handbook* (Kobylarz, 1996). The *National Career Development Guidelines K-Adult Handbook* is based on developmental career counseling theory and has been validated through exhaustive review by practitioners, leaders in the field, and field tests.
- A "template" taken from the National School-to-Work Office's web site. This template offers a list of suggested activities to enhance the career development of all students.
- The Career Development Activities Chart. This chart is designed to indicate how the two models (the National Career Development Guidelines and School-to-Work) can intersect to promote developmental career guidance through appropriately selected activities for students at all developmental levels, including elementary and middle/junior high school.
- A list of materials and resources to be used by practitioners in career guidance activities for elementary and middle/junior high school students. These resources and materials are listed in four sections: Grades K-3, Grades 4-6, Grades 7-8, and Other Resources.
- Address list for Sources of Information. This section provides a listing of manufacturers, publishers, and distributors whose catalogs served as the primary sources of information for this resource guide.

- A list of names and addresses of State Supervisors of Career Guidance
- A list of names and addresses of State Occupational Information Coordinating Committee (SOICC)
- A list of names and addresses of State School-to-Work Coordinators and/or Grantees
- Brief abstracts with contact information for the Regional Education Laboratories
- A brief abstract describing ERIC/CASS information sources

LIMITATIONS OF THE RESOURCE GUIDE

As the National Career Development Guidelines indicate, career guidance focuses on three critical developmental areas: self-knowledge, educational and occupational exploration, and career planning. While all three components are critical to effective development of career-related competencies, this guide focuses on educational and occupational exploration and career planning. A wealth of literature exists to support the enhancement of self-knowledge for elementary and middle school students, but the deliberate purpose of this guide is to provide a list of resources related more specifically to exploration and planning.

Additionally, although new electronic resources are emerging at a very rapid pace and many of these resources are excellent, the technology to support the use of these resources remains widely disparate across the nation's elementary and middle schools. Many of these resources are currently available on web sites and through the internet. Others resources vary widely in cost, and many are quite expensive. In an attempt to be timely in providing a resource guide for other materials, this resource guide limits information on the electronic resources available for career exploration and planning. A supplemental guide including electronic resources is under consideration for future publications.

**NATIONAL CAREER DEVELOPMENT GUIDELINES
COMPETENCIES AND INDICATORS - ELEMENTARY SCHOOL**

(Kobylarz, 1996)

Self-Knowledge

COMPETENCY I: Knowledge of the importance of a positive self-concept.

- Describe positive characteristics about self as seen by self and others.
- Identify how behaviors affect school and family situations.
- Describe how behavior influences the feelings and actions of others.
- Demonstrate a positive attitude about self.
- Identify personal interests, abilities, strengths, and weaknesses.
- Describe ways to meet personal needs through work.

COMPETENCY II: Skills to interact positively with others.

- Identify how people are unique.
- Demonstrate effective skills for interacting with others.
- Demonstrate effective skills in resolving conflicts with peers and adults.
- Demonstrate positive group membership skills.
- Identify sources and effects of peer pressure.
- Demonstrate appropriate behaviors when peer pressures are contrary to one's beliefs.
- Demonstrate awareness of different cultures, lifestyles, attitudes, and abilities.

COMPETENCY III: Awareness of the importance of growth and change.

- Identify personal feelings.
- Identify ways to express feelings.
- Describe causes of stress.
- Identify and select appropriate behaviors to deal with specific emotional situations.
- Demonstrate healthy ways of dealing with conflicts, stress, and emotions in self and others.
- Demonstrate knowledge of good health habits.

Educational and Occupational Exploration

COMPETENCY IV: Awareness of the benefits of educational achievement.

- Describe how academic skills can be used in the home, workplace, and community.
- Identify personal strengths and weaknesses in subject areas.
- Identify academic skills needed in several occupational groups.
- Describe relationships among ability, effort, and achievement.
- Implement a plan of action for improving academic skills.
- Describe school tasks that are similar to skills essential for job success.
- Describe how the amount of education needed for different occupational levels varies.

COMPETENCY V: Awareness of the relationship between work and learning.

- Identify different types of work, both paid and unpaid.
- Describe the importance of preparing for one's career.
- Demonstrate effective study and information-seeking habits.
- Demonstrate an understanding of the importance of practice, effort, and learning.
- Describe how current learning relates to work.
- Describe how one's role as a student is like that of an adult worker.

COMPETENCY VI: Skills to understand and use career information

- Describe work of family members, school personnel, and community workers.
- Identify occupations according to data, people, and things.
- Identify work activities of interest to the student.
- Describe the relationship of beliefs, attitudes, interests, and abilities to occupations.
- Describe jobs that are present in the local community.
- Identify the working conditions of occupations (e.g., inside/outside, hazardous).
- Describe way in which self-employment differs from working for others.
- Describe how parents, relatives, adult friends, and neighbors can provide career information.

COMPETENCY VII: Awareness of the importance of personal responsibility and good work habits.

- Describe the importance of personal qualities (e.g., dependability, promptness, getting along with others) to getting and keeping jobs.
- Demonstrate positive ways of performing work activities.
- Describe the importance of cooperation among workers to accomplish a task.
- Demonstrate the ability to work with people who are different from oneself (e.g., race, age, gender, people with disabilities).

COMPETENCY VIII: Awareness of how work relates to the needs and functions of society.

- Describe how work can satisfy personal needs.
- Describe the products and services of local employers.
- Describe ways in which work can help overcome social and economic problems.

Career Planning

COMPETENCY IX: Understanding how to make decisions.

- Describe how choices are made.
- Describe what can be learned from making mistakes.
- Identify and assess problems that interfere with attaining goals.
- Identify strategies used in solving problems.
- Identify alternatives in decision making situations.
- Describe how personal beliefs and attitudes affect decision making.
- Describe how decisions affect self and others.

COMPETENCY X: Awareness of the interrelationship of life roles.

- Describe the various roles an individual may have (e.g., friend, student, worker, family member).
- Describe work-related activities in the home, community, and school.
- Describe how family members depend on one another, work together, and share responsibilities.
- Describe how work roles complement family roles.

COMPETENCY XI: Awareness of different occupations and changing male/female roles.

- Describe how work is important to all people.
- Describe the changing life roles of men and women in work and family.
- Describe how contributions of individuals both inside and outside the home are important.

COMPETENCY XII: Awareness of the career planning process.

- Describe the importance of planning.
- Describe skills needed in a variety of occupational groups.
- Develop an individual career plan for the elementary school level.

NATIONAL CAREER DEVELOPMENT GUIDELINES

COMPETENCIES AND INDICATORS - MIDDLE/JUNIOR HIGH SCHOOL

(Kobylarz, 1996)

Self-Knowledge

COMPETENCY I: Knowledge of the influence of a positive self-concept.

- Describe personal likes and dislikes.
- Describe individual skills required to fulfill different life roles.
- Describe how one's behavior influences the feelings and actions of others.
- Identify environmental influences on attitudes, behaviors, and aptitudes.

COMPETENCY II: Skills to interact positively with others.

- Demonstrate respect for the feelings and beliefs of others.
- Demonstrate an appreciation for the similarities and differences among people.
- Demonstrate tolerance and flexibility in interpersonal and group situations.
- Demonstrate effective skills in responding to criticism.
- Demonstrate effective group membership skills.
- Demonstrate effective social skills.
- Demonstrate understanding of different cultures, lifestyles, attitudes, and abilities.

COMPETENCY III: Knowledge of the importance of growth and change.

- Identify feelings associated with significant experiences.

- Identify internal and external sources of stress.
- Demonstrate ways of responding to others when under stress.
- Describe changes that occur in the physical, psychological, social, and emotional development of an individual.
- Describe physiological and psychological factors as they relate to career development.
- Describe the importance of career, family, and leisure activities to mental, emotional, physical, and economic well-being.

Educational and Occupational Exploration

COMPETENCY IV: Knowledge of the benefits of educational achievement to career opportunities.

- Describe the importance of academic and occupational skills in the work world.
- Identify how the skills taught in school subjects, academic and contextual, are used in various occupations.
- Describe individual strengths and weaknesses in school subjects.
- Describe a plan of action for increasing basic educational skills.
- Describe the skills needed to adjust to changing occupational requirements.
- Describe how continued learning enhances the ability to achieve goals.
- Describe how skills relate to the selection of high school courses of study.
- Describe how aptitudes and abilities relate to broad occupational groups.

COMPETENCY V: Understanding the relationship between work and learning.

- Demonstrate effective learning habits and skills.
- Demonstrate an understanding of the importance of personal skills and attitudes to job success.
- Describe the relationship of personal attitudes, beliefs, abilities and skills to occupations.

COMPETENCY VI: Skills to locate, understand, and use career information.

- Identify various ways that occupations can be classified.
- Identify a number of occupational groups for exploration.
- Demonstrate skills in using school, community, and technology resources to learn about occupational groups.
- Identify sources to obtain information about occupational groups including self employment.
- Identify skills that are transferable from one occupation to another.
- Identify sources of employment in the community.

COMPETENCY VII: Knowledge of skills necessary to seek and obtain jobs.

- Demonstrate personal qualities (e.g., dependability, punctuality, getting along with others) that are needed to get and keep jobs.
- Describe terms and concepts used in describing employment opportunities and conditions.
- Demonstrate skills to complete a job application.
- Demonstrate skills and attitudes essential for a job interview.

COMPETENCY VIII: Understanding how work relates to the needs and functions of the economy and society.

- Describe the importance of work to society.
- Describe the relationship between work and economic and societal needs.
- Describe the economic contributions workers make to society.
- Describe the effects that societal, economic, and technological change have on occupations.

Career Planning

COMPETENCY IX: Skills to make decisions.

- Describe personal beliefs and attitudes.
- Describe how career development is a continuous process with series of choices.
- Identify possible outcomes of decisions.
- Describe school courses related to personal, educational, and occupational interests.
- Describe how the expectations of others affect career planning.
- Identify ways in which decisions about education and work related to other major life decisions.
- Identify advantages and disadvantages of various secondary and postsecondary programs for the attainment of career goals.
- Identify the requirements for secondary and postsecondary programs.

COMPETENCY X: Knowledge of the interrelationship of life roles.

- Identify how different work and family patterns require varying kinds and amounts of energy, participation, motivation, and talent.
- Identify how work roles at home satisfy needs of the family.
- Identify personal goals that may be satisfied through a combination of work, community, social, and family roles.
- Identify personal leisure choices in relation to lifestyle and the attainment of future goals.
- Describe advantages and disadvantages of various life role options.
- Describe the interrelationships among family, work and leisure decisions.

COMPETENCY XI: Knowledge of different occupations and changing male/female roles.

- Describe advantages and problems of entering nontraditional occupations.
- Describe the advantages of taking courses related to personal interest, even if they are most often taken by members of the opposite gender.
- Describe stereotypes, biases, and discriminatory behaviors that may limit opportunities for women and men in certain occupations.

COMPETENCY XII: Understanding the process of career planning.

- Demonstrate knowledge of exploratory processes and programs.
- Identify school courses that meet tentative career goals.
- Demonstrate knowledge of academic and school-to-work transition opportunities offered at the high school level.
- Describe skills needed in a variety of occupations, including self-employment.

- Identify strategies for managing personal resources (e.g., talents, time, money) to achieve tentative career goals.
- Develop an individual career plan, updating information from the elementary-level plan and including tentative decisions to be implemented in high school.

SCHOOL-TO-WORK TEMPLATE

(www.stw.ed.gov/factsht/template.htm)

The following template is taken from The National School to Work Learning and Information Center web site (www.stw.ed.gov/factsht/template.htm). The template identifies a variety of components associated with school-to-work and serves as a self-assessment tool for state and local grantees. The stages of implementation described for each component include: Vision, Planning, Early Implementation, and Maintaining the System.

While this template is not to be used as an evaluation tool, it can serve as a resource for those who are looking at the necessary components for administering and implementing a school-to-work initiative. The template can help programs identify gaps and “next steps” in implementing their systems, identify needed technical assistance, communicate information about school-to-work systemic issues with key stakeholders, address staff development needs, and direct capacity-building efforts.

School-Based Components

- Restructure schools around career majors including all aspects of industry.
- Restructure school schedules.
- Establish career paths throughout the K-16 system.
- Change culture of the schools around STW.
- Align ongoing programs to STW system.
- Gain and maintain support and participation of students, teachers, parents, school boards, teacher and other school related unions, counselors, school and district administrators, community-based organizations.
- Establish rigorous academic content and performance standards.
- Develop and integrate curricula.
- Engage employers to assist schools with curriculum restructuring and all other STW activities.
- Link school activities in the workplace -- e.g., join curriculum development, personnel, roles, and connections between teachers and worksite supervisors.
- Develop site-based collaboration for STW activities.
- Build in collaboration time for teachers.
- Provide professional development.
- Offer teacher internships at worksites.
- Reform postsecondary teacher education (preservice/in-service).

- Implement innovative teaching methodologies.
- Use applied learning methodologies.
- Use authentic assessment.
- Offer comprehensive career counseling.
- Develop individual education and career development plans.
- Provide generic job-related skills (e.g., interviewing, job search, and resume development).
- Serve all student and provide equal access to all program components for out-of-school youth (graduates and dropouts), low-income youth, low-achieving youth, limited English speakers, youth with disabilities, academically talented youth, youth in rural areas, non-traditional employment for young women.

Work-Based Components

- Recruit employers.
- Recruit unions.
- Maintain support and participation of employers and unions.
- Adopt work-based learning curricula.
- Offer a continuum of work-based learning (job shadowing, structured work experience, paid work experience).
- Provide alternative strategies for work-based learning.
- Structure a planned program of training, including individualized student worksite learning plans.
- Place and support students in the workplace.
- Provide employee development to ensure quality work-based learning.
- Review health, safety, and legal issues.
- Document general workplace competencies.
- Establish occupation skill standards.
- Serve all students and provide equal access.

Connecting Activities

- Generate strategies to connect and school-based and work-based learning.
- Develop collaborative agreements between schools and employers.
- Develop collaborative agreements between secondary and postsecondary education.
- Design processes for connecting intermediary organizations to school-to-work system.
- Conduct marketing and PR for all stakeholders including students, teachers, parents, school boards, counselors, school and district administrators, employers, unions, community-based organizations, and state and local officials.
- Support continued involvement of all stakeholders.
- Establish governance, leadership, and coordination at all levels.
- Connect to state economic and workforce development activities.
- Develop strategic plans (e.g., 1-3-5 year) for implementation at school, district, local, and state levels.

-
- Provide technical assistance to local partnerships and stakeholders.
 - Provide transportation and other support services.
 - Conduct labor market research and analysis.
 - Evaluate, monitor, and revise school-to-work system continuously.
 - Leverage resources to institutionalize system.
 - Serve all students and provide equal access.

CAREER DEVELOPMENT ACTIVITIES CHART

EXPLANATION OF ACTIVITIES

The Career Development Activities Chart and the K-8 breakout chart on pages 14 and 15 provide an overview of developmental career-related activities that can serve as part of school-to-work. Although a wealth of literature exists on both career education and school-to-work, practitioners often look for clearer connections between the two concepts. They need to know what kinds of activities will actually support their implementation efforts and what activities are appropriate for different developmental levels.

The explanations below describe several career-related school-to-work activities depicted on the Career Development Activities Charts. Each description below is also accompanied by a list of the primary competencies from the National Career Development Guidelines that are addressed by each school-to-work activity. While many activities listed below address a number of competencies indirectly, the specific competencies identified in each description are those that directly address the activity described.

The Career Development Activities Chart is offered for the purpose of showing sample school-to-work activities for a comprehensive career guidance that begins in elementary school and continues through postsecondary education. Altogether, the selected activities move from general awareness to acquisition of skills, knowledge, and understanding. The activities are a sampling of school-based activities, work-based activities, and connecting activities, as outlined in the *School-to-Work Opportunities Act of 1994*. The steps are provided as a visual representation of the developmental nature of career guidance. (While some of the activities listed below are more appropriate for high school or postsecondary levels, their explanations are provided for the purpose of distinguishing different developmental levels of similar or the same activities.)

School-Based Activities

- **Academic/Career Pathways**

Introduction to Academic/Career Pathways. The initial stage of career guidance calls for developing an awareness of how skills and occupations are related to each other and how different occupations and careers are related. Information on career pathways should be incorporated regularly into classroom activities, and career counselors should provide supportive information during class discussions and activities.

√ Specifically addresses elementary school NCDG competencies 5, 6, 8, 12

Orientation and Planning for Academic/Career Pathways. This developmental stage in the academic and career planning processes requires orientation to the concept of career pathways. Orienting students to career pathways includes working with parents and with students to inform them about occupations within the clusters, related skills and abilities, academic pathways to support areas of interest and ability, labor market data, and other general information related to pathways. The orientation and planning phases are most appropriate before students begin making academic selections for high school course work.

√ Specifically addresses middle/junior high school NCDG competencies and indicators 4, 5, 6, 7, 8, 9, 10, 11, 12

Guidance and Counseling for Academic/Career Pathways. After students and parents sufficiently understand career pathways and have begun planning, the student's progress through the pathway must be monitored carefully. The role of the counselor and other school staff should include systematic and periodic checks of student progress and trouble-shooting. The counselor should provide leadership in addressing any needed changes by acting as a student advocate and by functioning in concert with faculty, administration, and parents in enabling students to succeed. All information related to students' progress within the academic and career pathway should be considered throughout the guidance and counseling process.

√ Specifically addresses high school NCDG competencies 4, 5, 6, 7, 8, 9, 10, 11, 12

- **Applied Courses**

Based on current research, the integration of academic and vocational education is the key that unlocks the door to increased academic success. Part of the integration of curriculum is the opportunity to apply what is learned. While applied academics is critical at every age, it takes on increased significance as students are connecting the world of school to the world beyond school. Providing additional experience in learning through applied course work can greatly enhance the learning process and is a necessary part of the career education/school-to-work connection.

√ Specifically addresses high school NCDG competencies 4, 5, 6, 7, 8, 9, 10, 11, 12

- **Career Counseling**

Career counselors must be able to assist learners in their attempts to connect their knowledge of self and their knowledge of careers with knowledge of the world of work. Throughout the educational process, career counseling must include developmental approaches that

move from awareness at the elementary level to knowledge, skills, and understanding at the middle/junior high school level to greater skills and understanding at the high school level. Career counselors can use critical times in the educational continuum to assist learners in the ultimate transition from school to work. While career guidance and counseling practices provide student support throughout the educational process, career counseling takes on different dimensions of relevance at the late high school or postsecondary level. At that point, counseling must include direct intervention with students based on their needs, which will include, at the very least, immediate access to and assistance with assessments, job information, labor market data, and materials related to advanced training and education.

√ Specifically addresses all elementary, middle/junior high, and high school NCDG competencies

- **Career Days**

Career Fairs. These events highlight specific careers for students through special speakers, exhibits, crafts, and other activities that demonstrate the complexity of jobs within certain career clusters (e.g., Agriculture Fair, Communications Fair, Medicine Fair). These events are particularly appropriate at the elementary level and can be held for a half day, a full day, or an entire week with specific activities scattered throughout each day. The objective of Career Fairs should be to generate awareness of the range of activities and career opportunities associated with particular fields of study.

√ Specifically addresses elementary school NCDG competencies 4, 5, 6, 7, 8, 10, 11, 12

In-School Career Days. Career Days at the middle school level can be highly effective when the speakers are brought in for one day each semester to speak to students during their regularly scheduled classroom activities. Teachers should work with counselors and other staff to plan speakers who can provide curriculum-relevant information. Motivational speakers can conduct kick-off assemblies for larger groups of students, but the students at the middle school level benefit from connecting the classroom activities with the world beyond the classroom through a full day of special activities and speakers who enter into their world in the classroom. Speakers should be provided with opportunities to meet with teachers and school staff to plan the Career Day presentations. Parents should also be included in the day's activities by being invited to attend the Career Day, by assisting with facilitating the speakers and providing snacks and meals throughout the day, and by completing evaluations of their impressions of their child's reaction to the speakers.

√ Specifically addresses middle/junior high school NCDG competencies 4, 5, 6, 7, 8, 9, 10, 11, 12

- **Career-Oriented, Interdisciplinary Summer School**

An innovative approach to summer school is to replace remediation with a unit-based, interdisciplinary approach with teams of teachers who design projects that connect students to the world beyond the classroom. In many areas where summer school is traditionally viewed as remedial, this career-oriented option has broadened the population served to all types of students. Related field trips, classroom speakers, and college and university field trips can be included in the summer school activities. Portfolios allow students to record their summer school learning experiences.

√ Specifically addresses middle/junior high and high school NCDG competencies 4, 5, 6, 7, 8, 9, 10, 11, 12

- **Classroom Speakers Bureau**

All school districts should work with local area employers and other agencies to maintain a list of speakers who could make presentations in the classroom. The speakers bureau is appropriate for all age levels. A database should be maintained with speakers' names, position titles, employers' information, times they are available to make classroom presentations, their preference of age-level for their presentations, and a list of topics on which they can make presentations to students.

√ Specifically addresses elementary school NCDG competencies 4, 5, 6, 7, 8, 9, 10, 11, 12 and middle/junior high school competencies 4, 5, 6, 7, 8, 9, 10, 11, 12

- **Middle/Junior High School Field Trips and High School Field Trips**

Students in grades 5 and 6 should be provided the opportunity to visit their local middle school during a regular school day, and students in middle school should be provided the same chance to visit their local high school. Student mentors should be assigned to all visiting students, and the students should proceed through a "typical" school day. This activity breaks down many barriers between age groups and provides the opportunity for younger students to confront the fear and awkwardness of entering the next level of school by being placed with an older and experienced "mentor for the day." This activity also gives students a firsthand look at academic skills they will need to succeed in the school course work ahead.

√ Specifically addresses elementary and middle/junior high school NCDG competencies 1, 2, 3, 4, 9, 10

- **Mentoring**

Although the concept of mentoring has been viewed as having value in the lives of youth since the time of the Ancient Greeks, the passage of the *School-to-Work Opportunities Act of 1994* has brought increased attention to this valuable option for enhancing student success. School-based mentoring provides mentors who are willing to come on-site at the school during the school day and work with students in their academic environment. School-based mentors serve a variety of crucial roles in the lives of students, including acting as friends, serving as role models for students, linking students to other cultures and values, acting as career counselors, listening as confidantes, serving as encouragers, supplementing the work of teachers and acting as tutors to students with specific academic needs, working as student advocates, coaching students, and negotiating on behalf of students. Other mentoring functions vary based on the age of the student being mentored and that student's particular needs.

√ Specifically addresses all elementary, middle/junior high, and high school NCDG competencies

- **Portfolio Implementation and Development**

As educators and employers begin to look differently at student potential and ability, portfolios take on increased significance in helping students proceed through school and move to the world beyond school. Portfolios can be used for planning purposes and should be introduced early in the career guidance process. Portfolios should include enough design flexibility to include accurate and adequate representations of students' experiences both in school and in alternate activities. Portfolio development should record course work within career paths, and it should also include records of field trips, job shadowing, other alternate learning experiences, and service learning activities. Student portfolios should be a major resource tool in career education and school-to-work activities.

√ Specifically addresses elementary, middle/junior high school, and high school NCDG competencies 1, 3, 4, 5, 7, 9, 10, 11, 12

- **Tech Prep Introduction, Orientation, Enrollment, and Advanced Skills Training**

A much-acclaimed program for promoting career-related education and school-to-work is the Tech Prep initiative. As part of the Tech Prep program and the successful development of technical skills required in today's work place, early orientation to technical skills and career paths

is essential. Career guidance must support students who are interested in career paths that move them toward the acquisition of skills, knowledge, and abilities for specific technical areas where academic and work-based paths can intersect at appropriate developmental levels. An introduction to both technical and vocational programs must begin as early as middle school in order to prepare students for enrollment at the junior level in high school so that students can enroll in Tech Prep programs by the eleventh grade. This introduction needs to be followed by more deliberate orientation to technical skills and occupations. A strategic and developmental approach to Tech Prep will provide easier access to more advanced secondary and postsecondary training and will help eliminate repetition of course material through 2+2 or 4+2 articulated curriculum, which promotes the continued development of technical skills at advancing levels during the last two years of high school and throughout postsecondary level training. Many Tech Prep programs are addressed in school-within-a-school environments and within career academies as well.

√ Specifically addresses middle/junior high and high school NCDG competencies 4, 5, 6, 7, 8, 9, 10, 11, 12

- **Vocational Introduction, Orientation, Enrollment, and Courses**

Vocational enrollment should also be based on strategic career guidance. Placement of students in vocational programs at the eleventh grade level should be preceded by skill and interest assessments and by orientation that indicate that placement in a vocational curriculum is appropriate. Vocational curriculum should meet both academic and vocational needs of students through applied and integrated curriculum and through both school- and work-based learning experiences that enhance the development of vocational skills. Many vocational programs are now being addressed in school-within-a-school environments and within career academies.

√ Specifically addresses high school NCDG competencies 4, 5, 6, 7, 8, 9, 10, 11, 12

Work-Based Activities

- **Accredited Work-based Courses**

As part of the continuum of career education, students should be allowed to participate in courses that are collaborative in design and function. Academic staff should work with work-site mentors to avoid work-based learning that is menial and non-instructive and should work together to design a work-based experience that addresses specific competencies. Since the goal of this work-based learning experience is to make it a true learning experience, the work-based courses

should be accredited, and student progress should be jointly monitored by both the academic instructor and the work-site mentor.

√ Specifically addresses high school NCDG competencies 4, 5, 6, 7, 8, 9, 10, 11, 12

- **Apprenticeships**

The history of apprenticeships is rich and long. Technically, apprenticeship is career education that combines extensive on-the-job training with classroom instruction. Typically, apprenticeships provide a long-term opportunity for training at the hands of a “master.” In apprenticeships, less experienced learners are matched with more skilled craftspeople who are able to provide direct, “hands on” assistance in skill acquisition, with an end goal of mastery to a specific level of competence based on performance of the skill that has been tested at the required level of proficiency. Apprenticeships are most often paid work-site experiences with an end goal of employment in the skill area. These learning experiences also often include a written contractual agreement between a business/industry and the participating apprentice, which includes stipulations for completion of training and periodic review of performance.

√ Specifically addresses high school and adult NCDG competencies 4, 5, 6, 7, 8, 9, 10, 11, 12

- **Business Field Trips**

Depending on the nature of the business and the size of the group, business field trips can provide viable learning opportunities for students of all ages. Classroom teachers or group facilitators should make clear to the business what the goals of the field trip are and should work with business partners to assure that the trip is designed to meet the appropriate developmental stage. For example, field trips for elementary students should provide a broad look at the nature of business conducted and the types of jobs available. Middle school students should be provided with information related to skills required for certain jobs and with information that relates the place of the business/industry in the local economy. High school students should be provided with extended information on the nature of the business, the place of the business/industry in the local economy, the types of jobs available, the skills and education required for those jobs, and other pertinent information that will increase their understanding of the world of work.

√ Specifically addresses elementary, middle/junior high, and high school NCDG competencies 5, 8, 11, 12

- **Career Days**

More mature students, such as high school and postsecondary students, often benefit from large scale career days in which a number of employers are able to “show their wares.” Speakers should be scheduled to make presentations periodically throughout the day to discuss the relationship between education and work in their particular industry. Representatives of as many employers as possible from the region should be available at booths or tables located in a large central area during the Career Day so that students can get more information about the employer, the education required for certain jobs, and the employment potential. One large area should also be available for all regional employers to display information and to provide entry-level job information.

√ Specifically addresses high school NCDG competencies 5, 8, 11, 12

- **Internships**

For students who are more ready to make choices about skills they would like to acquire or to practice, internships should be designed that provide for supervised acquisition of more advanced skills. The options are as limitless as the jobs available. The goal of an internship is to provide highly supervised participation in acquiring more advanced skills and knowledge-based on the identified interests and abilities of the students who participate and the related needs of the participating business or industry. Internships can be paid or unpaid work-based experiences.

√ Specifically addresses high school and postsecondary school NCDG competencies 4, 5, 6, 7, 8, 9, 10, 11, 12

- **Job Shadowing**

Random Job Shadowing. Like all other activities, job shadowing should be structured at appropriate developmental levels. Job shadowing should begin at the 9th grade level with broad, on-site exposure to the world of work. Throughout the 9th and 10th grade students should be provided with opportunities to visit eight to twelve businesses. Ideally, one day a month should be designated as a community job shadowing day. For example, October could focus on retail and sales businesses, on utility industries and service businesses, December on government and social services, January on hospitals and medical businesses, February on manufacturing businesses, March on union jobs, and April on education. Transportation should be provided to pick up students and deliver them to various participating business sites where they will spend the day observing a designated work-site mentor. Matches should be made for students with the goal of providing them with real life exposure to what different occupations actually require and what

skills are required on the job for various types of jobs. (In truth, negative experiences are as valuable as positive ones: The goal is to allow the students to observe first hand a real life work experience.) All random job shadowing observations should be kept in a log and should be included in a portfolio. Professional development should be conducted that enhances the experience of student participants through the development of appropriate classroom activities where these students can reflect on their experiences and where all other students in their classes can also learn from the experiences of the participants. Students should be provided with materials for observation and should be prepared to bring the experience back to the school setting. Work site mentors should be provided with training and materials to enhance the experience.

√ Specifically addresses high school NCDG competencies 4, 5, 6, 7, 8, 9, 10, 11, 12

Extended Job Shadowing. After visiting a number of work sites and working with a number of work site mentors, students should come to end of their 10th grade year with a good notion of what does and what does not interest them. Based on these experiences and on a number of assessments and interest inventories, students at the 11th grade level should be provided opportunities to further investigate what interests them and to spend more extended time with a work-site mentor. Structures for extended job shadowing can be set up based on the availability of the mentor and the student but should generally fall within the range of 20-30 hours per semester. Training should be provided for all work-site mentors and materials, and training should be provided for all participating students. Professional development should be provided to allow teachers to plan how these experiences can be integrated into classroom activities and other course work and assignments.

√ Specifically addresses high school NCDG competencies 4, 5, 6, 7, 8, 9, 10, 11, 12

- **Work-based Mentoring**

All learning that takes place on a work site should be monitored by a work-site mentor. The work-site mentor should be responsible for accurately representing the skills and competencies for jobs, the educational needs for specific jobs, and information related to how the job fits into the organization as a whole. In addition, depending on the nature of the work-based learning experience, the work-site mentor should monitor student progress in developing competencies appropriate for that work-based experience.

√ Specifically addresses all high school and postsecondary NCDG competencies

Connecting Activities

- **Job Fairs**

Postsecondary institutions are ideal environments in which a number of employers can come together to provide information on job opportunities. In areas where strong partnerships exist between a postsecondary educational institution and the business/industrial community, job fairs can provide ready access to information to a diverse community of workers with different skill levels and interests. Employers benefit by having access, through the educational entity, to screening and assessment processes available through the institution. Students and other learners from a community can greatly benefit from centralized access to job information.

√ Specifically addresses postsecondary (adult) NCDG competencies 4, 6, 7, 12

- **Job Placement Services**

Postsecondary institutions within a local region can also provide support in placing learners in jobs. In many regions of the country, community colleges in particular are viewed as *the* primary resource for job placement. Because of the diverse population served by most community colleges through their open access policy, employers often look to these institutions for most immediate access to a hiring pool. Effective career guidance at this level will include aggressive means of supplying access to job placement.

√ Specifically addresses postsecondary (adult) school NCDG competencies 4, 6, 7, 12

- **Field Trips**

General field trips are well suited to elementary students and should be designed to generate awareness in students of the world beyond home and school. These trips can include visits to museums, zoos, parks and other recreational facilities; caroling to nursing homes or sheltered care facilities; trips to fire stations and other community facilities; and a wide range of other possibilities for learning about the world beyond school and home. Although field trips typically generate a level of awareness, students at all grade levels may have awareness needs that can be met through field trips conducted in conjunction with other academic activities.

√ Specifically addresses elementary school NCDG competencies 2, 10, 11

RESOURCE LISTS

The four resource lists which follow provide listings of some of the resources and materials currently available to be used for elementary and middle/junior high school career guidance. These resources and materials are listed in three sections: Grades K-3, Grades 4-6, Grades 7-8, and Other Resources. The materials are listed alphabetically by the title of the resource. Each listing contains the following information:

Column 1 - Title, Author (if available), Date of Publication, Format of Material or Resource, Recommended Age Level, Source of Materials (Manufacturer/Publisher and Distributor), and Price (as of 7/97).

Column 2 - Rating by Practitioners (This section is not included in the Other Resources.)

Column 3 - Description of Materials

The information contained in Column 1 may be incomplete but is based on information available to us at the time of publication. Once the list of resources and materials was compiled from catalogs and various other sources, it was sent out for review to all the sources listed in the section of this text entitled Sources of Information, which is located near the end of this text. The publishers and distributors were asked to edit the resource list and update any information, including pricing information. They were also asked to identify themselves as "sources of origin" (i.e., the original publisher or manufacturer of the materials) or as "distributor" (i.e., one who distributes the materials for another source of origin). Our chart makes those distinctions, if it was provided for us, in item number 6 in the left hand column of each chart.

Once we received the edits from the publishers and distributors, our resource lists were updated based on the information they provided for us. Most of the publishers and distributors responded to our query; however, a few of the distributors did not respond.

At the recommendation of our special Advisory Board for this project, we have also included ratings by selected practitioners in the field of elementary and middle/junior high school career guidance. Near the completion of the research project, we asked our Advisory Board members to recommend a panel of reviewers for the materials who would be knowledgeable enough to provide ratings of the materials based on their experience. For materials that have been widely used during the past several years, we hope this rating by practitioners will be helpful to those in the field who are less familiar with the resources and materials. However, the ratings should be considered helpful rather than definitive. Many new products are out on the market on a regular basis. While many of the materials in the resource guide are excellent materials, many of them are also so new that they have not been used widely and, therefore, cannot be rated. The

ratings indicate only what the practitioners who reviewed this resource guide know on the basis of their own experience, which is inherently limited.

The reviewers represent a nationwide sample of people with extensive experience and background in working with elementary and middle school career guidance. Many of the reviewers have been involved in state or regional efforts to review career guidance materials for use with elementary and middle school students. Other reviewers also have extensive experience in career guidance related to school-to-work. Several of the reviewers have held top-level positions in national counseling organizations. While they are few in number, their experience and knowledge, collectively, is wide and deep, and we value their opinions of the materials with which they are familiar.

Column 2 of the charts represents the ratings of these practitioners. Reviewers were asked to rate materials as the numbers below indicate if the materials met most of the criteria for that particular rating. The ratings were based on the following criteria:

5= Excellent Resource

- Promotes knowledge of careers for all students at stated developmental levels
- Meets standards of equity or designates a specific target audience
- Is user friendly for both teachers/counselors and students
- Is compatible for use with current equipment, technology, and/or other resources

4= Good Resource

- Promotes knowledge of careers but might be clearer in how the resource can be used appropriately to meet developmental needs
- Meets most standards of equity or designates a specific target audience
- Is generally user friendly, but guidelines and assistance for use by the teachers/counselors or the students might be enhanced
- Is generally compatible for use with current equipment, technology, and/or other resources but has presented a few minor problems in implementation

3= Average Resource

- Promotes general knowledge of careers but may be limited in addressing specific developmental competencies

- Presents a relatively traditional approach to career awareness; could do a better job of meeting standards of equity or of designating a specific target audience
- Could be more user friendly by providing more specific guidelines and assistance for use with students and/or by teachers/counselors

Is able to used with current equipment, technology, and/or other resources but has presented some problems in implementation

2= Poor Resource

- Lacks impact in promoting knowledge of careers
- Does not meet standards of equity or does not clarify that it is addressing a specific target audience
- Requires extensive adaptation or modification for use by students and/or teachers/counselors
- Has presented significant problems for use with current equipment, technology, and/or other resources

1= Very Poor Resource

- Does not promote knowledge of careers
- Does not meet standards of equity or does not specify a target audience
- Is not user friendly for students and/or teachers/counselors
- Is not compatible with current equipment, technology, or other resources

DK= I have not used this resource, or I am not familiar enough with this resource to offer my opinion of its quality. If no reviewers indicated knowledge of the materials by using the DK rating, we have indicated in the rating column that the materials were "not rated" by reviewers.

Column 3 of the resource lists provides a description of the resources and materials. For the most part, these descriptions were taken directly from catalogs or promotional materials provided by the suppliers or distributors of the materials and were edited only for the sake of clarity or consistency with other descriptions in the resource guide. In an attempt at fairness, our edits included the removal of marketing language, such as "exciting" or "fun-filled" or "popular," from the original descriptions.

Students will get a taste of the many choices they will have some day for an occupation. The key concept of these video programs is to assist students in developing investigative skills related to potential career paths, and to expand their awareness of career areas (broad sets of occupations within which all jobs can be classified). The two program set should be used in close conjunction with the <i>Children's Dictionary of Occupations</i>. In this publication, the teacher will find additional information and activities from which to initiate classroom project.

It includes a teacher's guide with additional information and activities Minority and ethnic groups are represented as well as male and females in nontraditional roles.
1. <i>Careers in Math: From Astronauts to Architects</i> 2. HRM Video 3. NA 4. Video kit 5. Grade 5-9 6. HRM Video 7. \$175.00	n=2 Rating=4.50	<ul style="list-style-type: none"> In this video, students are taken on a tour through careers where they can see professionals using math on the job. The video attempts to blast the myth that mathematics has no purpose outside the classroom. Two student hosts, looking to find an occupation that does not require math skills, see how number sense, critical thinking, and reasoning skills are essential in just about every walk of life. Art, cooking, even cosmetology are just some of the fields in which students will see math in action. The video also delves deeper into the mathematical applications that arise in high-interest careers, such as fire fighting, computer game programming, and environmental engineering. When the video is over, follow up activities capitalize on student interest by inviting them to assume the role of real-world professionals. Students work together to solve a variety of on-the-job problems, such as planning a menu for their own restaurant, or finding the quickest route to a fire. Worksheets are designed to help students use a variety of creative-solution strategies. Students will gain understanding of how algebra and geometry are applied to real-life situations, as well as new insight into their own potential.

<ol style="list-style-type: none"> <i>DISCOVER for Junior High and Middle Schools</i> ACT, Inc. 1992 last update Software for IBM and Apple II Grades 6-9 ACT, Inc. One time perpetual license fee: Single user station - \$630; Multiple user stations at one site - \$950; Multiple user stations at multiple sites - \$580 per site 	<p>n=5</p> <p>Rating=4.20</p>	<ul style="list-style-type: none"> <i>DISCOVER for Junior High and Middle Schools</i> was conceived and designed specifically for use by students prior to entering high school. The system begins by helping users become more aware of their personal interests and abilities. Then <i>DISCOVER</i> helps them explore options and make plans based on an awareness of their own unique abilities and interests. Through this process, the system supports the guidance program for all students. With <i>DISCOVER</i>, student will develop a sense of career focus and educational purpose that will guide them through the transition into high school. <i>DISCOVER</i> content is built on a conceptual model for organizing information about occupations. This model, ACT's World-of-Work Map, organizes and simplifies career exploration. The Map gives meaning to career exploration by grouping the entire range of current and emerging occupations into a few logical and understandable categories. Job categories are located on this Map based on the extent to which they involve working with Data, Ideas, People, and Things. The same occupational classification system is used in all of ACT's career and educational planning programs, including the ACT Assessment Program. When used with high school level and older audiences, the World-of-Work Map is modified to include additional detail. <i>DISCOVER for Junior High and Middle Schools</i> contains three major content sections plus a brief entry/exit section.: Entry/Exit, Part 1: You and the World of Work, Part 2: Exploring Occupations, and Part 3: Planning for High School.
<ol style="list-style-type: none"> <i>Dream Catchers</i> Norene Lindsay 1993 64-page student activity book with related instructional materials Intermediate Grades D=CFKR, JIST Works, Inc., Wintergreen Orchard House, Inc. \$29.95, set of 10 workbooks; \$14.95, teacher's guide; \$19.95, 80 reproducible activity sheets 	<p>n=9</p> <p>Rating=4.56</p>	<ul style="list-style-type: none"> <i>Dream Catchers</i> has been carefully designed to meet NOICC guidelines. <i>Dream Catchers</i> is an affordable solution for: initial career and educational awareness in the upper elementary grades. These materials are interesting, engaging, and easy to understand and use. The workbook, plus teacher's guide and a book of activity sheets create a complete, flexible program for use in class settings. The activities are arranged in three clusters of related topics: <ol style="list-style-type: none"> Capture Your Dreams: The Choice is Yours The Stuff Dreams Are Made Of: Discovering Your Skills Make Dreams Come True: Ability, Effort, and Achievement Students can work on activities independently, in small groups, or as part of a class. The Teacher's Guide is thorough with step-by-step lesson plans which are easy to adapt for special populations such as learning disabled or at-risk students.

1. <i>Get a Life Program</i> ASCA - NOICC - Authors: Kay Brawley, Nancy Pery, C. E. Van Zandt 1991, Revised 1996	n=6 Rating=4.33	<p><i>Get a Life</i> helps students plan their futures. Too often students of all ages think only for the moment. As a school counselor, it sometimes is tough to get even the best student to understand that they are at a pivotal place in their lives. The decisions they make now--Go to college? Get married? Look for a job?--will dictate their futures. It's often frustrating to motivate student who believe "the future" is this weekend.</p> <p>The <i>Get a Life Program</i> can help. The <i>Get a Life Program</i> uses individualized, easy to use personal planners and portfolios to help students figure out where they are, what they want, and how to get there. The key to the program is that the responsibility rests with the students. They are responsible for learning about themselves, exploring life roles, setting goals, and making the link between educational and career development. The <i>Get a Life Program</i> motivates students to gain control of their lives and manage their futures.</p> <p>The <i>Get a Life Program</i> is available in two versions--a personal planning portfolio for all students, and an employment planner for students in school-to-work programs. Both offer a comprehensive, tangible tool to encourage students to journal personal thoughts and feelings, reflect on important areas of life development, assess interests and motivations, and plan short- and long-term goals.</p> <p>The <i>Get a Life Program</i></p> <ul style="list-style-type: none"> - Is flexible, allowing you to tailor the program to your school and to programs you may already be using; - Provides a consistent system for documenting personal career development activities for all students; - Provides opportunities for an integrated curricula; - Involves parents and community members in preparing students for a more successful future in the workforce. - Aligns your school with national models of excellence. - Was designed by professionals for professionals and field tested with more than 5,000 students. <p>Student planners, facilitator's manuals, videos, and software are all available to allow for customized use of the program.</p> <p>The heart of the program is the student Personal Planner (or Personal Planning Portfolio) which contains a four-page Career Planner plus sections on: Self-Knowledge, Life Roles, Educational Development, Career Exploration and Planning.</p> <p>The <i>Get a Life Program</i> was designed through a cooperative agreement between the American School Counselor Association (ASCA) and the National Occupational Information Coordinating Committee (NOICC). The program links the National Career Development Guidelines with the Comprehensive Developmental School Counseling program model. The <i>Get a Life Program</i> was reviewed by a team of national experts in career development and pilot tested with over 5,000 students.</p>
2. <i>Life Portfolio</i> , facilitator's manual, facilitator's guide, videotape, and DOS software). \$48; portfolios - \$185 for 100, \$100 for 50, and \$60 for 25; STW transition planner - Facilitator's package - \$115.00, other packages same as above

The class can explore careers, get acquainted with social studies, or write reports using fully interactive resources. • Part 1: The Video - Each video introduces viewers to locations from A to Z (the airport to the zoo and places in between). • Part 2: The CD ROM - The interactive CD ROM offers both linear and interactive video as another high tech component of <i>Getting Inside</i>. Kids can see the entire program on a computer desktop, use it as refresher, and work through quizzes, games and puzzles. • Part 3: The World Wide Web - A frequently updated web page is available, linked to each topic in the series, with dozens of resources on the world wide web for student to do further exploration on <i>Getting Inside</i> subjects. Users can contact the developers of the program with opinions and ideas for further development of the series. • "Field Trips" include: The Zoo, The Fire Station, The Hospital, The Newspaper, The Television Station, The Library, The Airport, The Railroad Company, The Dairy, The Industrial Construction Site

The kit offers parents the insight and motivation they need to feel comfortable in a career planning support role, while giving counselors a valuable partner in their career guidance efforts. • Following are some of the specific topics and activities included in <i>Realizing the Dream</i>: <ul style="list-style-type: none"> - Exploring and cultivating the five ingredients of career decision making: self-concept, interests, abilities, preferences, and planning - Exploring occupations and developing a career plan - Selecting high school course work that supports career decisions - Choosing the type of postsecondary education or training appropriate to future goals - Identifying postsecondary institutions that meet the college-bound student's needs • <i>Realizing the Dream</i> was developed with the help of an advisory panel of career development experts, guidance counselors, and concerned parents. This panel worked to ensure <i>Realizing the Dream</i> would give parents the necessary resources to help their children with career planning at home, while supplementing counselor's efforts at school.

<ol style="list-style-type: none"> <i>Career Journeys</i> NA NA Booklet and answer folder Middle School CFKR \$78.75, 25 booklets and 25 answer folders 	<p>n=2</p> <p>Rating=4.00</p>	<ul style="list-style-type: none"> <i>Career Journeys</i> is a complete career assessment and educational planner. <i>Career Journeys</i> emphasizes the concept of job families, skills-based job levels and the importance of cross-functional job skills. This knowledge will help student identify their abilities that can be used in many areas, making it easier for them to find several jobs in which they can excel. After using <i>Career Journeys</i>, students will have developed the skills necessary to analyze career options in relation to their abilities and personalities. Students will also be able to identify differing levels of educational preparation and examine the related career preparation options in school and in the community. The <i>Career Journeys</i> program works along with the Career Gateways program in that once students have learned the skills to analyze their career plan, they can review and update the individual Career Plan and can set up an Education Plan. <i>Career Journeys</i> helps student prepare for high school and the next step of career planning.
<ol style="list-style-type: none"> <i>Career Match</i> Cambridge Educational 1993 IBM/1994-Mac Software Middle School + O=Cambridge Educational, D=JIST Works, Inc. \$149.00, IBM and Mac 	<p>n=2</p> <p>Rating=3.00</p>	<ul style="list-style-type: none"> This disk-based program is a condensed version of the <i>Career Counseling System</i>. Students systematically define their interests and objectives, then match them to a database of more than 500 occupations. They investigate the characteristics and qualifications for any particular occupation, then organize a plan to enter an appropriate vocational school, college, or the job market. The system saves students' profiles and allows them to complete or change responses at any time.

<p>1. <i>Career Planning Survey</i></p> <p>2. ACT, Inc.</p> <p>3. 1997</p> <p>4. Machine scorable assessments of interests and abilities, plus self-ra of abilities, manuals, reusable test books</p> <p>5. Grades 8-10</p> <p>6. O=ACT, Inc.</p> <p>7. Option A - \$3.40 each; Option B - \$2.90 each; Manuals - \$7.50 each; Reusable test booklets - \$.55 each (volume discounts available)</p>	<p>n=5</p> <p>Rating=3.60</p>	<p>• ACT's Career Planning Survey is a career guidance assessment system that provides four comprehensive activities for students in grades 8-10.</p> <ul style="list-style-type: none"> - Two Academic Ability Tests - covering reading comprehension and numerical skills -- help students understand the importance of these two abilities in all occupations. Results are nationally normed by grade level. - An Inventory of Work-Relevant Abilities helps student rate themselves in 15 work-relevant ability areas, many of which are not assessed by tests. The inventory provides scores on six scale, corresponding to six career clusters--Business Contact, Business Operations, Technical, Science, Arts, and Social Service. - The Unisex Edition of the ACT Interest Inventory (UNIACT) assesses student likes and dislikes for 90 common activities. UNIACT is especially helpful for younger persons who have not made the connection between the work world and the activities they like to do. Like the Inventory of Work-Relevant Abilities, UNIACT provides scores for the six career clusters. Scores from UNIACT and the Inventory of Work-Relevant Abilities are linked to the World-of-Work Map, which locates career fields according to their involvement with data, ideas, people, and things. The World-of-Work Map helps students bridge the gap between test scores and the work world. <p>• Career Planning Survey benefits and advantages include that it is:</p> <ul style="list-style-type: none"> - A comprehensive career guidance program that can prepare students to make informed education and career decisions early in high school - A component of school-to-career transition strategies - Information to help schools meet Perkins Act requirements - An organizing force for school and curriculum restructuring - An efficient, cost-effective system - Flexible and quick - Integrated career assessment - Linked to individualized career exploration and information systems

1. <i>Careers in Math: From Astronauts to Architects</i> 2. HRM Video 3. NA 4. Video kit 5. Grade 5-9 6. HRM Video 7. \$175.00	n=1 Rating=5.00	<ul style="list-style-type: none"> In this video, students are taken on a tour through careers where they can see professionals using math on the job. The video attempts to blast the myth that mathematics has no purpose outside the classroom. Two student hosts, looking to find an occupation that does not require math skills, see how number sense, critical thinking, and reasoning skills are essential in just about every walk of life. Art, cooking, even cosmetology are just some of the fields in which students will see math in action. The video also delves deeper into the mathematical applications that arise in high-interest careers, such as fire fighting, computer game programming, and environmental engineering. When the video is over, follow up activities capitalize on student interest by inviting them to assume the role of real-world professionals. Students work together to solve a variety of on-the-job problems, such as planning a menu for their own restaurant, or finding the quickest route to a fire. Worksheets are designed to help students use a variety of creative-solution strategies. Students will gain understanding of how algebra and geometry are applied to real-life situations, as well as new insight into their own potential.

The system begins by helping users become more aware of their personal interests and abilities. Then <i>DISCOVER</i> helps them explore options and make plans based on an awareness of their own unique abilities and interests. Through this process, the system supports the guidance program for all students. With <i>DISCOVER</i>, student will develop a sense of career focus and educational purpose that will guide them through the transition into high school. <i>DISCOVER</i> content is built on a conceptual model for organizing information about occupations. This model, ACT's World-of-Work Map, organizes and simplifies career exploration. The Map gives meaning to career exploration by grouping the entire range of current and emerging occupations into a few logical and understandable categories. Job categories are located on this Map based on the extent to which they involve working with Data, Ideas, People, and Things. The same occupational classification system is used in all of ACT's career and educational planning programs, including the ACT Assessment Program. When used with high school level and older audiences, the World-of-Work Map is modified to include additional detail. <i>DISCOVER for Junior High and Middle Schools</i> contains three major content sections plus a brief entry/exit section: Entry/Exit, Part 1: You and the World of Work, Part 2: Exploring Occupations, and Part 3: Planning for High School.

<ol style="list-style-type: none"> <i>Exploring Career Pathways: A Guide for Students and Their Parents</i> (Texas' adaptation of <i>Exploring Career Paths: A Guide for Students and Their Families</i>) NA 1994 Student booklet (revised 1996) and facilitator's guide (revised 1997) Unstated O=Texas Education Agency, Home Economics Curriculum Center \$28.00, classroom set of 20 <i>Career Pathway Toolkit</i> - \$15.00 	<p>n=1</p> <p>Rating=3.00</p>	<ul style="list-style-type: none"> This workbook takes students through four steps to help them make a career pathway decision: identifying interests, abilities, and talents; considering the possible careers in each pathway in relationship to those interests, abilities, and talents; deciding which career pathway fits best; and selecting courses that are related to the chosen career pathway. The <i>Career Pathways Toolkit</i> provides supplementary materials for teachers and counselors who are using <i>Exploring Career Pathways</i>.
<ol style="list-style-type: none"> <i>Exploring Careers: What's Right for You?</i> Sunburst Communications 1997 33-minute video and teacher's guide Grades 7-12 Sunburst Communications \$99.95 	<p>n=0</p> <p>Not rated</p>	<ul style="list-style-type: none"> This video stresses that people who are happy and successful at work most often are pursuing careers that match their personality type. It uses the Holland Hexagon to help students identify their personality type and discover careers that draw on their strengths. It also explores a variety of career fields with emphasis on those with the greatest job potential in the 21st century. This video presentation calls identifying your personality type the first step in the career choice process, offers examples of the six types--Doer, Thinker, Creator, Helper, Persuader, and Organizer--and describes their characteristics. A series of on-screen questions follows each description to help viewers decide which personality type best fits their interests, abilities and aptitudes. This video investigates a variety of careers that match each personality type with emphasis on those where potential for jobs should be the greatest. Since most people will change jobs many times, viewer learn that choosing a career is a lifelong process.

1. <i>Get a Life Program</i> 2. ASCA & NOICC - Authors: Kay Brawley, Nancy Perry, C. E. Van Zandt 3. 1991, Revised 1996 4. Planner and portfolio, with facilitator's manual, introductory video, software, and Macintosh programming guide; school-to-work version also available 5. Grades 4-12 6. O=American School Counselor Association (ASCA); D=ASCA 7. Facilitator's package (includes <i>Get a Life Portfolio</i> , facilitator's manual, facilitator's guide, videotape, and DOS software), \$48; portfolios - \$185 for 100, \$100 for 50, and \$60 for 25; STW transition planner - Facilitator's package - \$15.00, other packages same as above	n=5 Rating=4.40	<ul style="list-style-type: none"> • <i>Get a Life</i> helps students plan their futures. Too often students of all ages think only for the moment. As a school counselor, it sometimes is tough to get even the best student to understand that they are at a pivotal place in their lives. The decisions they make now--Go to college? Get married? Look for a job?--will dictate their futures. It's often frustrating to motivate student who believe "the future" is this weekend. • The <i>Get a Life Program</i> can help. The <i>Get a Life Program</i> uses individualized, easy to use personal planners and portfolios to help students figure out where they are, what they want, and how to get there. The key to the program is that the responsibility rests with the students. They are responsible for learning about themselves, exploring life roles, setting goals, and making the link between educational and career development. The <i>Get a Life Program</i> motivates students to gain control of their lives and manage their futures. • The <i>Get a Life Program</i> is available in two versions--a personal planning portfolio for all students, and an employment planner for students in school-to-work programs. Both offer a comprehensive, tangible tool to encourage students to journal personal thoughts and feelings, reflect on important areas of life development, assess interests and motivations, and plan short- and long-term goals. • The <i>Get a Life Program</i> <ul style="list-style-type: none"> - Is flexible, allowing you to tailor the program to your school and to programs you may already be using; - Provides a consistent system for documenting personal career development activities for all students; - Provides opportunities for an integrated curricula; - Involves parents and community members in preparing students for a more successful future in the workforce. - Aligns your school with national models of excellence. - Was designed by professionals and field tested with more than 5,000 students.

<p><i>Get a Life Program</i> (cont.)</p>		<ul style="list-style-type: none"> • Student planners, facilitator's manuals, videos, and software are all available to allow for customized use of the program. • The heart of the program is the student Personal Planner (or Personal Planning Portfolio) which contains a four-page Career Planner plus sections on: Self-Knowledge, Life Roles, Educational Development, Career Exploration and Planning. • The <i>Get A Life Program</i> was designed through a cooperative agreement between the American School Counselor Association (ASCA) and the National Occupational Information Coordinating Committee (NOICC). The program links the National Career Development Guidelines with the Comprehensive Developmental School Counseling program model. The <i>Get A Life Program</i> was reviewed by a team of national experts in career development and pilot tested with over 5,000 students. • <i>GIS Junior</i> is career planning software especially designed to meet the needs of middle and junior high school students. • The program includes the <i>Harrington-O'Shea Career Decision-Making System Interest Inventory</i>; an <i>Occupation File</i> of 500 general and 10000 specialized occupational description; and a <i>Majors and Career File</i> that includes an assessment of 40 college majors. • In addition, the results from other interest inventories, including the <i>Self-Initiated Search</i>, can be used to access the information in <i>GIS Junior</i>. • <i>GIS Junior</i> meets the goals of the School-to-Work Opportunities Act of 1994 endorsed by the ACA and the NCDA. • This developmental system is a comprehensive, results-based, self-contained guidance system. • It offers a plan for achieving positive behavioral outcomes, increased self-concept and development of career awareness for students at all levels, ages 4-14. Emphasis is placed on helping all student succeed, especially those at risk. • System Manual contains a bound book that provides a complete explanation of the system information on how to integrate the system into a school's guidance and counseling program and observation/evaluation instruments and a three-ring binder with plastic pockets of information to be duplicated for use with staff, students, and family.

<p>1. <i>VIESA (Vocational Interest, Experience, and Skill Assessment)</i></p> <p>ACT, Inc.</p> <p>1994 last update</p> <p>Paper materials including self-scoring exam kit, guidebook and user handbook</p> <p>Level 1 - Grades 8-10</p> <p>O=ACT, Inc.</p> <p>Exam kit - \$6.50 each; tests \$26.50 for 25/package; handbook - \$4.25 each</p>	<p>n=3</p> <p>Rating=3.00</p>	<ul style="list-style-type: none"> • <i>VIESA</i> from ACT is a self-scored inventory of career-related interests, experiences, and skills supplemented by an informal ranking of job values that takes less than sixty minutes to complete. • All <i>VIESA</i> assessments and career exploration activities are completed in the Career Guidebook. The first five units in the guidebook introduce individuals to the key concepts of the program: Unit 1, Understanding basic world-of-work concepts; Unit 2, Identifying work-related interests; Unit 3, Identifying work-related skills; Unit 4, Selecting a trial job choice; and Unit 5, Identifying career options. The next three units are designed to help individuals explore their career options. Unit 6 offers extended career exploration and guidance activities, while Units 7 and 8 expand career education activities and an individual's awareness of possible career options. • The goals of <i>VIESA</i> are to help individuals expand self-awareness, develop career awareness, identify personal relevant career options, and begin exploring and evaluating their career options. As individuals complete <i>VIESA</i>, they consider five types of career related questions: What do I like? (Interests) What have I done? (Experiences) What can I do? (Skills) What are my options? (Educational/Career Possibilities) In addition <i>VIESA</i> uses the ACT World-of-Work Map to give individual yet comprehensive structure for relating information about their personal characteristics to the world of work. This added feature makes <i>VIESA</i> a teaching module as well as an assessment instrument. • <i>VIESA</i> is available in two levels: grades 8-10 and grade 11-adult. • A User's Handbook can be purchased to accompany <i>VIESA</i>. These resources from the handbook can be useful to counselors and teachers who are preparing career guidance instructional units and follow-up activities: Visuals and Discussion Guide for Introducing <i>VIESA</i> to Groups; Unit on Educational Goals; Materials for Obtaining the Six UNIACT Interest Scores and Additional Activities that Provide Information About Work-Related Interests; Local Sources of Information About Careers; Index to Descriptions of <i>VIESA</i> Occupations; and Some Ways to Evaluate <i>VIESA</i>'s Effectiveness.

HRM Video 7. \$189.00 	<p>n=0</p> <p>Not rated</p>	<ul style="list-style-type: none"> • In the video, real students talk about their career aspirations and their views on education. Each of these interviews is juxtaposed with a profile of an accomplished professional working in the same field that the student aspires to pursue. As each subject is followed through the work day, the correlation between the life skills learned in school and those applied in the workplace becomes clear. • Among the professionals featured are an auto mechanic, an athletic trainer for the New York Giants, and a master chef. • All of the subjects draw on their experiences to help motivate teens to stay in school and strive to excel. • Follow up activities provided in the Teacher's Resources Book allow students to further explore career options and the ways in which education can help them meet their goals. • The video kit includes a 30-minute live-action video, a teacher's resource book and newspapers.
<ol style="list-style-type: none"> 1. <i>What's Your Attitude?</i> 2. HRM Video 3. NA 4. Video 5. Grades 7+ 6. HRM Video 7. \$189.00 	<p>n=0</p> <p>Not rated</p>	<ul style="list-style-type: none"> • This video and print package allows students to identify specific attitudes which can help or hurt a worker's performance on the job. • Dramatic vignettes and interviews with real-life bosses allow viewers to understand that a good work attitude depends upon much more than being in a cheerful mood. • Specific traits are identified and modeled in a series of vignettes: punctuality, enthusiasm, the willingness to learn, how to prioritize and achieve goals, how to deal with constructive criticism, and how to organize one's time in the most efficient way. • Teacher's Resource Book reinforces the video concepts and allows students to role-play appropriate workplace attitudes.
<ol style="list-style-type: none"> 1. <i>Where's the Dough?</i> 2. NA 3. NA 4. Game and teacher's manual 5. Middle School + 6. Center on Education and Work 7. \$59.00 	<p>n=1</p> <p>Rating=4.00</p>	<ul style="list-style-type: none"> • This game introduces students to the process of starting a business and business terminology. • The game is divided into five segments: Description, Marketing, Organization, Finance, and Operations. Each segment contains an introduction that describes the objectives for that segment, terminology that student may not be familiar with, orientation activities, and closing activities with suggested discussion questions for review. • Players use a die and cards to advance through the board segments, which represent the phases of starting and the challenges of operating a cookie company. • "Where the Dough?" is a versatile game that can be played in a five-day format for in-depth learning or in a one-day format as an overview to starting a business. A teacher's manual is included.

O=Center on Education and Work 7. \$25.00 	<ul style="list-style-type: none"> • This 26-page list of Web sites was created by the staff of the Center on Education and Work to help navigate to some of the sites on the World Wide Web most useful for exploring career options and searching for job opportunities. Many of these sites were found over hundreds of hours "surfing" the system, and others were suggested by staff members working in specialized areas. In selecting entries for inclusion, the staff has used their best judgment and three minimum qualifications: the URL (Web address) had to connect to an active Web site; the information had to be relevant and potentially valuable to students, educators, and counselors; and the information had to be clear and understandable to wide audience of users. • This list represents a very small sample of what is available in cyberspace. It is in the very nature of the Web that it is constantly changing: new sites and pages are being created by the minute, old sites and pages are daily being removed or updated with new information, and links are constantly being created and destroyed to form an ever-changing network of interrelated information. This booklet is updated annually.

This lab is one of ten regional educational laboratories established by the Office of Educational Research and Improvement, U.S. Department of Education, to focus on school improvement throughout the United States. The labs conduct applied research, development, and technical assistance for educators, parents, and decision makers. The Appalachia Educational Laboratory (AEL) serves as the regional educational lab for Kentucky, Tennessee, Virginia, and West Virginia. To address the goals toward the improvement of professional quality, curriculum and instruction, community support, and equal educational access for all students, the Lab operates the following eight projects: (1) Classroom Instruction program (teachers), (2) School Governance and Administration program (school administrators and school board members), (3) Colleges and Schools program (colleges for teacher education), (4) State Policy program (policy makers), (5) Information Services program (direct services to educators), (6) Community Liaison to Urban Education program (underrepresented groups), (7) Rural, Small Schools program (rural citizens and educators), and (8) Rural Excel program (with state education agencies and local education agencies personnel). Under the Community Liaison to Urban Education program, the concerns, interests, and special needs of underrepresented groups are assessed and addressed in the Lab's program and activities. The Rural, Small Schools program provides information about promising current practices and seeks to set up technology based networks of local schools with college libraries. The Rural Excel program works with state and local educators to develop, test, and disseminate appropriate new learning materials and processes for rural schools. AEL also operates the ERIC Clearinghouse on Rural Education and Small Schools. The Lab publishes The Link newsletter. A publications catalog is available upon request.

WESTED (WestEd)

Dean H. Nafziger, Director

This lab is one of ten regional educational laboratories established by the Office of Educational Research and Improvement, U.S. Department of Education, to focus on school improvement throughout the United States. WestEd provides advanced learning and effectiveness for educators, parents, and policy makers through research, applications, and partnerships. Services include instructional development, staff training analysis and design, organizational design, evaluation, research, technical writing, and information dissemination. Products include program guidelines, handbooks, manuals, resource directories, information catalogs, audiovisual materials, curriculum models and materials, institutional designs, conference proceedings, and

evaluation and research reports. The Laboratory also participates in research, development, and technical assistance projects on such topics as essential skills, experience-based career education, staff development, and initiatives to improve opportunities for minority and female students.

MID-CONTINENT REGIONAL EDUCATIONAL LABORATORY (McREL)

J. Timothy Water, Executive Director
Annora Bryant, OERI Contact
Colorado Office
2550 S. Parker Road, Suite 500
Aurora, CO 80014-1678
info@mcrel.org

(303) 337-0990
FAX:(303) 337-3005

This lab is one of ten regional educational laboratories established by the Office of Educational Research and Improvement, U.S. Department of Education, to focus on school improvement throughout the United States. The labs conduct applied research, development, and technical assistance for educators, parents, and decision makers. McREL serves as the regional educational laboratory for Colorado, Kansas, Missouri, Nebraska, North Dakota, South Dakota, and Wyoming. The mission of McREL is to create a community of interest among those individuals and organizations interested in learning how to help schools meet the needs of an ever changing society. The key strategy the Lab uses is to identify and encourage the use of knowledge that improves education. Lab activities include the dissemination of policy information, product development, networking, training, and technical assistance. Examples of activities include studies of special populations (e.g., urban dropouts, students in small schools, and Indian and Hispanic youth) to identify potential educational problems; networks of people with common interests in urban schools, equity, and higher education; a state policy and trends database which provides basic information on education issues; and strategies for improving services to small, rural schools. McREL's Equity Center works to increase access to quality education for all students and disseminates information to increase awareness of equity issues and identify successful programs for reducing bias and stereotyping. Acting as a clearinghouse, the Equity Center links a computerized database on 20 major equity issues to potential users. Publications include the McREL Update newsletter; Noteworthy, an annual magazine; Heartland, the newsletter of McREL's Equity Center; and Policy Notes, a bimonthly summary of issues relevant to educational policy makers.

NORTH CENTRAL REGIONAL EDUCATIONAL LABORATORY (NCREL)

Jeri Nowakowski, Executive Director
Mary Campbell, OERI Contact
1900 Spring Road, Suite 300
Oak Brook, IL 60521-1480

(630) 571-4700
(800) 356-2735
FAX:(630) 571-4716

NCREL--the North Central Regional Educational Laboratory--is a not-for-profit agency funded through multiple government and commercial grants and contracts. Simply put, NCREL exists to help students learn better, teachers teach better, and policy makers make better policy. Areas of expertise include: improved learning and school restructuring, educational uses of technology, policy analysis, leadership, evaluation, professional development, and dissemination.

The largest single source of their funding is a five-year contract with the Department of Education's Office of Educational Research and Improvement (OERI). The contract's annual budget of \$5.3 million allows NCREL to continue service to some 23,000 public and private schools and their communities in the Midwest. NCREL also operates the North Central Regional Technology Education Consortium (NCRTEC) under a five-year grant funded at \$1.8 million per year. Founded in 1984 by the region's chief state school officers and deans of colleges of education, NCREL is governed by a 29-member board of directors. In addition to major federal grants and contracts, NCREL also has been successful in winning awards for state and local work.

NORTHWEST REGIONAL EDUCATIONAL LABORATORY (NWREL)

Ethel Simon-McWilliams, Executive Director
Carol Mitchell, OERI Contact

<http://www.nwrel.org>
(503) 275-9500
(800) 547-6339
FAX:(503) 275-9489

As one of ten regional educational laboratories established by the Office of Educational Research and Improvement, U.S. Department of Education, to focus on school improvement throughout the United States, the Northwest Regional Educational Laboratory (NWREL) serves the states of Alaska, Idaho, Montana, Oregon, and Washington. The lab conducts applied research and provides development, and technical assistance to educators, parents, and decision makers, designed to improve outcomes for children, youth, and adults. The Northwest Report newsletter serves NWREL's constituents.

PACIFIC REGION EDUCATIONAL LABORATORY (PREL)

U.S. Department of Education, OERI
Dr. John Kofel, Executive Director
Joe Wilkes, OERI Contact
828 Fort Street Mall, Suite 500
Honolulu, HI 96813-4321
askprel@prel.hawaii.edu
<http://prel-oahu-1.prel.hawaii.edu>
(808) 533-6000
FAX:(808) 533-7599

As one of ten Office of Educational Research and Improvement's regional laboratories, the Pacific Resources for Education and Learning (PREL) helps schools improve educational outcomes for children, youth, and adults. This mission is carried out by assisting educators, families, government, community agencies, business, and labor in maintaining cultural literacy and improving quality and equality in educational programs and processes. This is accomplished through forums, research, technical assistance, evaluation, training, information resource activities, and product and procedure development and/or dissemination. PREL serves Pacific children and educators in American Samoa, Commonwealth of the North Mariana Islands, Federated States of Micronesia, Guam, Hawaii, Republic of the Marshall Islands, and Republic of Palau.

NORTHEAST AND ISLANDS LABORATORY AT BROWN UNIVERSITY (LAB)

John P. Zarlengo, Interim Director
Lynn Spencer, OERI Contact
144 Wayland Avenue
Providence, RI 02906
LAB@brown.edu <http://www.lab.brown.edu>
(401) 274-9548
(800) 521-7650
FAX:(401) 421-7650

This lab is one of ten regional educational laboratories established by the Office of Educational Research and Improvement, U.S. Department of Education, to focus on school improvement throughout the United States. The labs conduct applied research, development, and technical assistance for educators, parents, and decision makers. The Northeast and Islands Laboratory at Brown University serves the area of Connecticut, Maine, Massachusetts, New Hampshire, New York, Puerto Rico, Rhode Island, Vermont, and the Virgin Islands. A variety of programs and activities in three broad initiatives support a unifying theme. Designing Schools for Enhanced Learning is a multi-faceted technical assistance and action research initiative designed to promote a fundamental reconceptualization of student and school success. A Regional Policy initiative supports policy development and implementation activities in areas related to maintaining a quality educator workforce in the region. School Improvement Services offers information, training, consultation, and other services to a wide variety of clients. The Regional Lab Reports is a topical newsletter published 3-4 times per year about some aspect of making schools work for the success of all students.

SOUTHEASTERN REGIONAL VISION FOR EDUCATION (SERVE)

Roy H. Forbes, Director
Deborah Williams, OERI Contact
P.O. Box 5367
Greensboro, NC 27435
info@serve.org <http://www.serve.org>
(919) 334-3211
(800) 755-3277
FAX:(910) 334-3268

Funded as one of ten regional educational laboratories established by the Office of Educational Research and Improvement, U.S. Department of Education, the mission of SERVE is to provide leadership, support, and research to assist state and local efforts in improving educational outcomes in the Southeast region, especially for students at risk and rural students. SERVE represents a coalition of business leaders, governors, policy makers, and educators who are seeking systemic, lasting improvement in education. The states involved in the consortium are Alabama, Florida, Georgia, Mississippi, North Carolina, and South Carolina. SERVE proposes to address critical issues that are shared throughout the region, work as a leader and catalyst to promote systemic educational improvement, serve as a broker of exemplary practices and state-of-the-art research, and become an invaluable source of information for existing organizations working to promote educational improvement. Examples of research and development activities the Laboratory will conduct include developing and field-testing a rural school-business partnership model and network; developing site-based accountability models- local measures of effectiveness; studying the effects of incentive programs on reducing dropout rates and on improving school conduct, academic achievement, and attendance of identified at risk students; and evaluating the impact of video communications and other telecommunications technology on rural school education. The Laboratory will conduct and disseminate topical research, technical assistance, and other Laboratory products via teleconferences, videotapes, satellite downlinks,

public broadcasting, interactive video disc technology, and through a network of rural education professionals.

SOUTHWEST EDUCATIONAL DEVELOPMENT LABORATORY (SEDL)

Wesley Hoover, Director
Gil Garcia, OERI Contact
211 E. Seventh Street
Austin 78701-3281
webmaster@sedl.org
<http://www.sedl.org>
(512) 476-6861
(800) 476-6861
FAX:(512) 476-2286

A private, nonprofit corporation, SEDL operates under a contract from the U.S. Department of Education's Office of Educational Research and Improvement (OERI) to serve as the Regional Educational Laboratory (REL) for the states of Arkansas, Louisiana, New Mexico, Oklahoma, and Texas. Services extended under the REL include: (1) enhancing family and community involvement in education; (2) addressing linguistic and cultural diversity; (3) aligning public policy to support education policies; (4) making instructional systems coherent; (5) applying technology to school restructuring and learning; and (6) changing the organization and management of schooling. SEDL's mission extends beyond REL operations and includes the operation of the following: (1) the Eisenhower Southwest Consortium for the Improvement of Mathematics and Science Teaching (Eisenhower SCIMAST) which provides classroom teachers in Arkansas, Louisiana, New Mexico, Oklahoma, and Texas with high-quality materials, practices, and testing strategies proven by research to help students learn; (2) the Southeast Comprehensive Regional Assistance Center, a consortium of institutions that assists schools in Alabama, Arkansas, Georgia, Louisiana, and Mississippi in enacting tenets of the Improving America's Schools Act; (3) Project ExCELL, a partnership between SEDL and the Texas Education Agency to coordinate statewide efforts to write new foreign language curriculum standards for K-12 schools; (4) the Southeast Regional Technology Consortium, which promotes wider use of educational technologies in Arkansas and Louisiana schools; (5) Arkansas AdVentures in Networking, an on-line school improvement and teacher mentoring program; and (6) the National Center for the Dissemination of Disability Research, which delivers the latest findings in disability research and shares dissemination strategies with professional researchers.

MID-ATLANTIC LABORATORY FOR STUDENT SUCCESS (LSS)

Temple University
Margaret C. Wang, Director
Greg Dennis, OERI Contact
Center for Research in Human Development & Education
933 Ritter Annex
13th St. and Cecil B. Moore Ave.
Philadelphia, PA 19122
lss@vm.temple.edu
<http://www.temple.edu/departments/lss>
(215) 204-3030
(800) 892-4440
FAX:(215) 204-5130

The mission of the LSS is to play a pivotal role in revitalizing and reforming education throughout the mid-Atlantic region by improving the region's capacity to bring lasting improvements in the learning of its increasingly diverse student population. The LSS will assist in

transforming research-based knowledge into useful tools that can be integrated into the educational reform process both within the region and nationally. Likewise, the work of the LSS will be continuously refined based on feedback from the field on what is working and what is needed. The ultimate goal of the LSS is a system that connects schools, parents, community agencies, professional groups, and higher education institutions and that gradually expands reform efforts in the region and is part of a high-tech national system for exchanging information. LSS researchers with expertise in bilingual education, economics, educational psychology, instructional technology, public policy, sociology, and politics of education focus on a broad program of research and development that aims to identify effective educational practices and policies that are currently in use; develop new strategies for effective classroom instruction; design and implement caring school environments that encourage resiliency among students in a variety of circumstances that place them at risk of school failure; and demonstrate the feasibility and effectiveness of a coherent and coordinated system of delivering services that connects families, schools, and communities in systemic ways to serve children and youth. States served includes Delaware, Maryland, New Jersey, Pennsylvania, and Washington, DC.

**ERIC CLEARINGHOUSE ON COUNSELING AND STUDENT SERVICES
(ERIC/CASS)**

UNC-Greensboro
Garry R. Walz, Director
Jeanne C. Bleuer, Associate Director
University of North Carolina at Greensboro
School of Education
1000 Spring Garden Street
Greensboro, NC 27412-5001
ericcass@iris.uncg.edu
(910) 334-4114
(910) 334-4115
(800) 414-9769
FAX:(910) 334-4116

CASS is one of the sixteen subject-oriented clearinghouses of the ERIC system. The Clearinghouse's scope includes the preparation, practice, and supervision of counselors at all educational levels and in all settings; the theoretical development of counseling and guidance; personnel procedures such as testing and interviewing and the analysis and dissemination of the resultant information; group work and case work; the nature of pupil, student, and adult characteristics; and personnel workers and their relation to career planning, family consultations, and student orientation activities. ERIC/CASS offers professionals products such as monographs, special issues papers, recent studies, computer search analyses, bibliographies and digests, as well as a quarterly information bulletin featuring Clearinghouse activities, products, and articles on timely topics. The Clearinghouse's staff also offers question-answering services; computer searching of the ERIC database; on-site user services with a complete ERIC microfiche collection at the ERIC Resources Center; and national, state, and local workshops on high-priority counseling concerns.
